### FORDHOOK FARMS AND EXPERIMENTAL GARDENS

Our Fordhook Farms are utilized largely for growing, testing and insuring the trueness-to-type of all the seeds we send out. Thousands of these tests are made annually as each strain is carefully compared with all similar strains in cultivation and the results carefully recorded. This is really the most exacting part of our business as seed growers, but it has helped to make the reputation of Burpee's Seeds—the best seeds that grow.

# Burpee's *New* Giant Sweet Peas

For years we have specialized in Sweet Peas, constantly working to improve the quality of existing varieties and to develop new ones. This year we offer six outstanding new Giant Spencer varieties, all originated on Burpee's Floradale Seed Farms.

## 3148 ROYAL RUFFLES

**Giant Ruffled** Flowers are of a flashing and brilliant scarlet-cerise carried evenly over almost all the standard except at the edges, which are slightly lighter. Flowers are exceptionally large, densely ruffled and frilled, and perfectly placed in fours on long, strong stems. Vigorous, free-blooming plants. **Oz. \$2.15.**

## 3146 RUFFLED PINK

**Giant Ruffled** Beautifully ruffled flowers of the most exquisite coloring—deep rose-pink on cream, lightening in color towards the base and outer margins of the petals. The large ruffled flowers are of fine substance and borne in fours on long, strong stems. Plants are vigorous and free-blooming. **Oz. \$2.15.**

Giant Ruffled  
Sweet Pea  
*Royal Ruffles*

*New*  
"Multiflora"  
Sweet Pea  
*Bountiful*

## 3150 BOUNTIFUL

**Multiflora** As the name implies, the outstanding feature of this new Sweet Pea is the extra number of blooms on a stem. When grown well, each produces 5, 6, or 7 flowers. Flowers are large, long stemmed, and of a lovely shade of mid-blue, lightening to a silvery mid-blue at the margins. **Oz. \$2.15.**

## 3151 HIS MAJESTY

Especially long-stemmed, large flowered, vigorous growing Sweet Pea. Color is a striking, brilliant salmon-cerise, equally intense from the margin of the blooms to the base. Flowers are mostly borne four to a stem, and while not particularly wavy they are especially attractive on account of their very simplicity. Free-blooming. **Oz. \$2.15.**

## 3154 PROLIFIC

**Multiflora** An outstanding color addition to the "many-flowered" group of Sweet Peas, being a most attractive, warm shade of rose-pink quite evenly distributed over the flower to within  $\frac{1}{4}$  in. of the margin, where it lightens a little. When well grown, they produce 5, 6, or 7 flowers to the stem. **Oz. \$2.15.**

## 3149 SALMON FANTASY

Distinct new color in the unique and interesting "flaked" group. The back of the standard and outside of the wings are flaked salmon-pink, while the front of the standard and the inside of the wings are white with a faint blushing showing through from the opposite side. **Oz. \$2.15.**

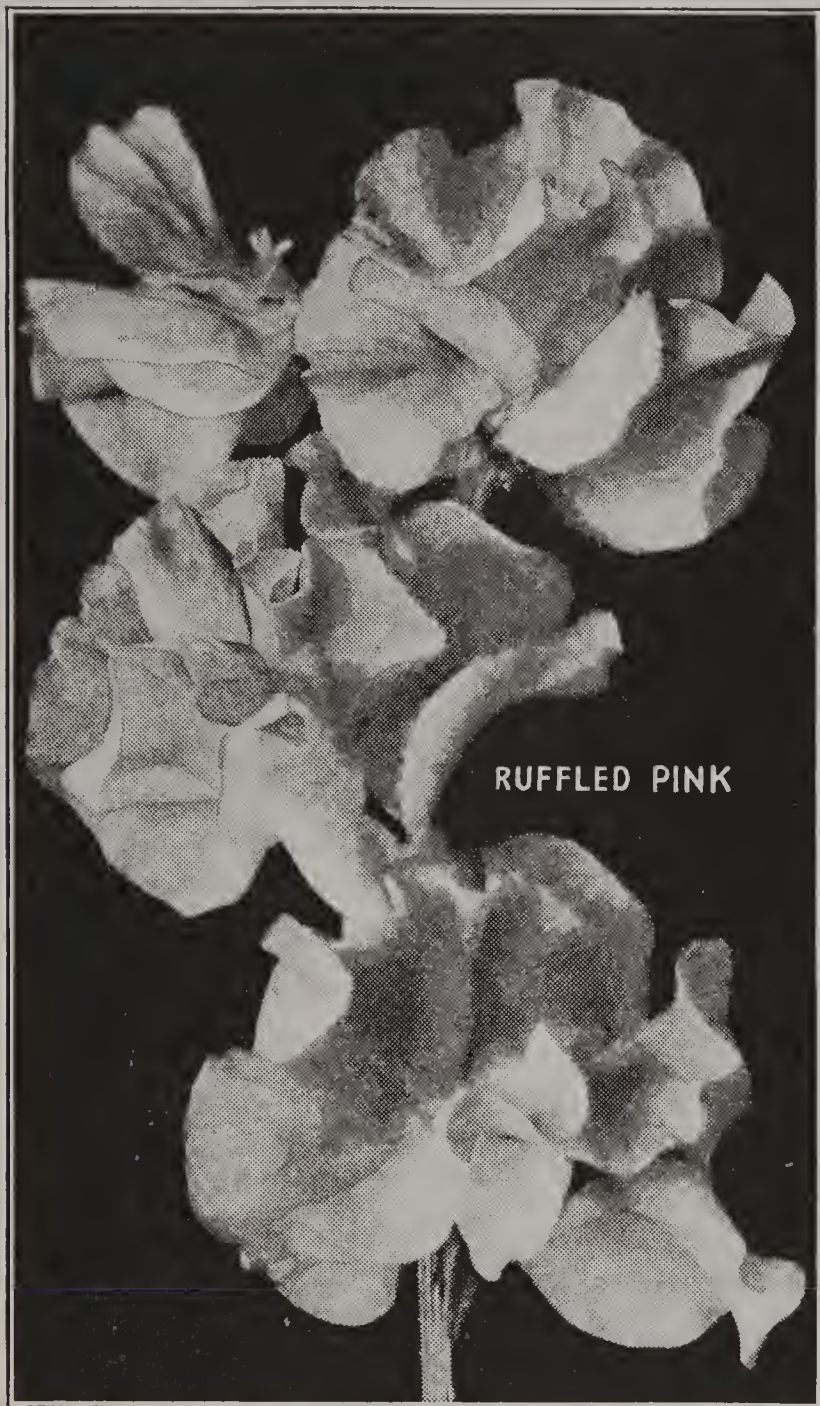

Burpee's *New* Early Flowering Sweet Peas, *Better Baltimore*, *Blue Jay*, *Joseph*, *Lively*, *Vera*, and *White Giant*, are offered on pages 36 and 37.

# Giant Ruffled Sweet Peas

*Most Beautiful of All—Originated on Burpee's Floradale Farms*

Giant Ruffled Sweet Peas are Burpee introductions, developed on Burpee's Floradale Seed Farms in California. They are distinguished by the unusual duplexness and extra frilliness of the flowers. This gives a double appearance to the large, waved and ruffled flowers which makes them so distinct. They are greatly admired wherever seen and have won the highest honors in the keenest competition.

## 3146 Ruffled Pink (New)

A wonderfully ruffled, vigorous growing, long-stemmed Sweet Pea of exquisite coloring—deep rose-pink on cream, becoming lighter towards the base and outer margins. The flowers are large, of fine substance, and nicely placed in fours on long, strong stems. A new Sweet Pea of the highest quality. **Oz. \$2.15.**

## 3148 Royal Ruffles (New)

Flowers are exceptionally large, heavily ruffled and frilled; a flashing and brilliant scarlet-cerise carried evenly over almost the entire flower, being slightly lighter at the edges. Plants are very vigorous, free blooming; flowers are perfectly placed in fours on long, strong stems. **Oz. \$2.15.**

## 3554 Sparkle

A gay, glad color, best described as glowing cerise, evenly spread over the standard and wings, varying only in tone in the lights and shadows created by the rufflings. Flowers are large, duplexed, beautifully ruffled, frilled and waved. **Oz. 70¢; 4 ozs. \$2.40; lb. \$8.00.**

## 3598 BURPEE'S GIANT RUFFLED SWEET PEAS, MIXED COLORS

This outstanding mixture represents the finest ever offered in Sweet Peas. It contains all of the named marvelous Giant Ruffled varieties offered on this page, and also many other colors of which we do not have, as yet, sufficient stock

**Oz. 20¢; 4 ozs. 60¢; lb. \$2.00; 2 to 9 lbs. @ \$1.90 per lb.; 10 lbs. or more @ \$1.80 per lb.**

**3467 Bonnie Ruffles** Salmon-pink on rich cream, the pink becoming a little deeper towards the edges of standard and wings. Gold Medal Winner, Scottish National Sweet Pea Society. Award of Merit, National Sweet Pea Society of Great Britain.

# Burpee's Early Flowering Sweet Peas

*Varieties are arranged in each color class from deep to light shades*

Burpee's Early Flowering Sweet Peas come into bloom 3 to 4 weeks earlier than the Summer Flowering varieties offered on pages 30 to 35. They are especially adapted for growing in frost-free sections and for earliest blooms outdoors in the North, and also valuable for winter flowering under glass. They are being planted more and more every year.

If you live in a locality where the late Sweet Peas have not done well for you, try some Early Flowering. They will bloom before the summer heat arrives. Sweet Peas do best in cool weather. If seed was not sown in the fall, sow as early in the spring as the ground can be prepared. They prefer an open, sunny location, and deep rich soil which must be well drained.

Burpee's Sweet Peas are famous the world over as the "Best That Grow." The flowers are extra large, of perfect form and texture, well placed on long, strong stems, and usually produced in sprays of four.

*At Burpee's Floradale Seed Farms, our plant breeders carefully select the best individual plants to furnish seed for the next year's sowing. Such plants are "caged" to prevent being mixed by bees.*

## Burpee's Experimental Grounds and Seed Farms

A glance at the above picture, which shows only a corner of our experimental grounds will give you some idea of the vast amount of work that goes on each year at our Floradale Seed Farms. By hybridization and the selection of the best individual plants for stock seed, standard varieties are being continually improved and new ones created.

Our staff of expert plant breeders, with keen eyes and a knowledge of just what makes one plant better than another, go through our growing fields, experimental grounds and test blocks day after day selecting those plants which show special merit. To prevent pollenization by bees carrying pollen from some less desirable plant, the selected plants are "caged," or, in other words, completely surrounded and covered with a muslin netting as shown in the picture above. Some of the "caged" plants are those which showed signs of a "break" or "mutation" and from which an entirely new or better variety may be developed.

The actual results of this careful work and the many breeding projects conducted both at Floradale and at Fordhook, are seen in the new and improved varieties of flowers and vegetables with which, year after year, Burpee has enriched the gardens of the world.
